report for assignment 2

Xuanyu Zhou

Introduction

Pennsylvania is selected for this report.

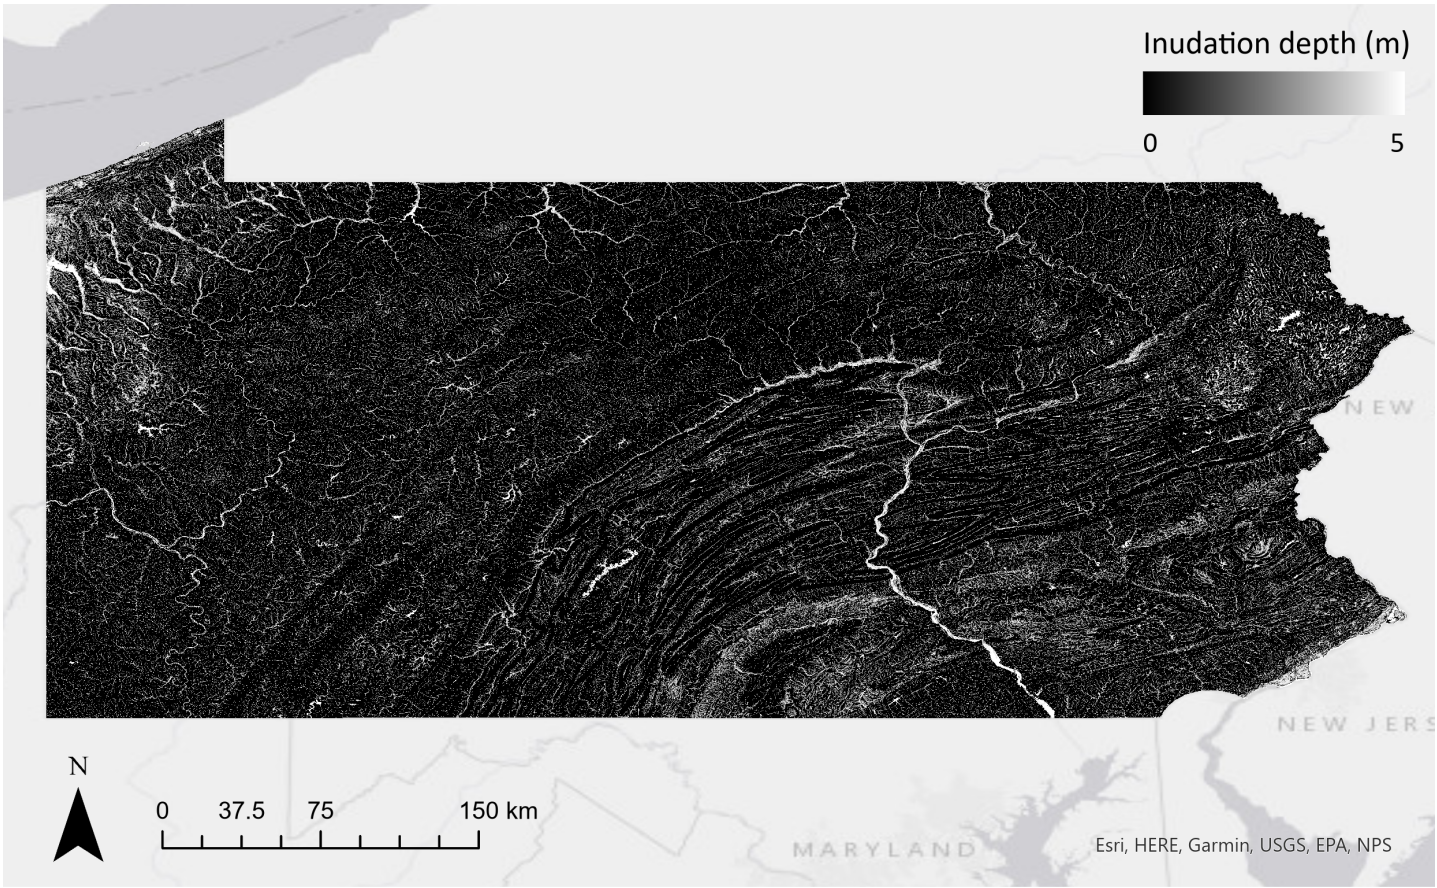

DEM data comes from USGS 1 arc-second DEM

State boundary for PA is downloaded from PennDOT Open Data

In total, 28 tiles were downloaded and combined. Then they were clipped into the boundary of PA.

Result

I got the final inundation depth map:

Rivers and valleys can be easily tell from the map. Also, the gap in between different tiles can be figured from the map.
